

Economics and Journalism, BS

The combined major in economics and journalism integrates the analytical and critical thinking skills from economics with the versatile and dynamic world of journalism. Combined with studying the principles, practices, and responsibilities of journalism, students have an opportunity to develop analytical skills that are useful to understand today's current economic events and debates. The skill sets students acquire allow them to better communicate information in areas such as public policy, business, law, and the media. The combined major highlights the important role journalism plays in shaping how economic issues are conveyed to the public.
